

## The new Zero-Smog<sup>®</sup> 6V protects your employees working environment.

Weller cares about your employees.

Developed from the well-known WFE 4S extraction unit, the new Zero-Smog<sup>®</sup> 6V gives you more!

Code No. T005 36 666 99

### Energy saving

The Zero-Smog<sup>®</sup> 6V has a sleep mode which will automatically reduce the turbine speed by 70 % when all extraction arms are closed and after a user defined time will switch the extraction unit off. This feature is automatically selected if connected to a WX solder station, or can be manually set at the extraction unit.

### Automatic pressure control

The turbine speed is automatically adjusted to maintain a constant flow of air through each extraction arm as arms are opened or closed. This saves energy and reduces the noise level of the unit.

### Health and Safety

The operation of the Zero-Smog<sup>®</sup> 6V is recorded on an internal memory which can be downloaded onto a USB memory stick for reporting purposes.

Save Energy

### Flexibility

The Zero-Smog<sup>®</sup> 6V is delivered with 1 Easy-Click 60 connector for an extraction hose for connection to an extraction arm fitted. 3 blanked ports are provided to receive additional Easy-Click connectors. The Zero-Smog<sup>®</sup> 6V can operate up-to 6 extraction arms by use of T-pieces. Castors are fitted for ease of movement.

### Maintenance

A filter condition indicator (red / yellow / green LED) and an audible alarm will signal when a filter change is needed.
