**ESD TOPGUN 3 230V 10FT SIDEKICK**  
SKU: IO100602

**Description**

Simco-Ion's Top Gun III is developed for light industrial applications. A high ion production attend to an optimal neutralisation of static charges. High blow-off force and low air consumption provide high-efficiency cleaning. A filter at the exit of the gun ensures that the air is clean. The gun body is lightweight and durable. It features a light touch trigger, making it comfortable even for extended use.

All functionality is built into the gun, including a flowcontrol valve, and a two-level LED which indicates if the gun is in "stand by" mode and if high voltage is currently active. Both the gun and cable are static dissipative. A hanger is provided for easy mounting. One gun can be connected to one power unit.
