

DATASHEET

Surface Resistance Meter 10V / 100V

This 10V / 100V surface resistance meter is ideal for accurately testing surface resistance for ESD control applications to the latest industry standards. It will test point-to-point, surface resistivity and resistance to ground.

SKU: 093-0089

Description

FEATURES AND BENEFITS :

- High quality build
- Accurate measurement

Application :

- Measures point-to-point surface resistivity
- Measures resistance to ground
- Enables testing of an EPA to latest industry standards
