

**DATASHEET**

**DURASTRIPE X-TREME**

**Description**

Xtreme DuraStripe combines a durable, impact resistant skin with an aggressive, conforming adhesive to deliver a striping material that conquers harsh industrial environments. Its specially designed surface layer is engineered to resist damage caused by pivoting and skidding forklift wheels, two of the most common causes of aisle marking destruction. Its beveled edge assists dragged pallets in sliding over the stripe to avoid slicing or tearing.

In the other words, DURASTRIPE X-TREME is the most rugged peel-&-stick striping material you can employ and recommended for:

- Rough flooring conditions
- Heavy forklift traffic
- Challenging and critical environments

**Available Options**

Length	Width	Colours
30 meters	5 cm	Red = R Orange = O Yellow = Y
60 meters	7.5 cm	Light Blue = LB Green = G Dark Blue = DB
120 meters	10 cm	Black = BK White = W Grey = GY
		Brown = BR Purple = PU
