

DATASHEET

Stannol Electric Hammer Soldering Iron
300W 230V
SKU: 230010

Description

Equipped with electrolytic copper bit, ceramic heater for extreme stressing, and wooden grip this electric hammer soldering iron is the best option for heavy soldering work such as radiators, gutters, cable- and commutator soldering. This also includes the applications with high heat requirements, thicker sheets (up to 1.5mm), and machine parts.

| | |
|--------------------|---------------------------|
| Power: | 300W |
| Voltage: | 230V |
| Max. temp. of bit: | 460oC |
| Bit material: | Copper |
| Warm-up time: | approx. 10 min. |
| Weight w/o bit: | 710GR |
| Heating element: | Ceramic in grey cast iron |

Application Areas

- Applications with high heat requirements
- Thicker sheets (300 W up to 1.5mm / 500 W up to 2.5 mm)
- Machine parts

Product Characteristics

- Very stable construction
- Classic design with wooden handle
- High power for high heat output
- Copper tips
- Two model lines:
 - metal heating element support in the steel case
 - ceramic heating element in the grey cast iron case
