

PRODUCT INFORMATION

Wire harness workbench with 0° to 80° angle adjustable worktop made of 1.5 mm thick powder-painted steel allows using magnetic plates with holders, retainers, corner posts and wire breakout systems which help to hold wires and form bundles on wire harness workbench. Magnetic plates are equipped with two potent (with 20 kg/s pull off force) magnets each thus allowing the usage of up to 5 kg bundles without their spontaneous movements.

Worktop angle adjustment and fixation is performed by side clamping handles.

Workbench supports unit dimensions: 1425x690 mm.

Article Code	Dimension(widthxheight)
SR-ZHG-15	1500x1400 mm
SR-ZHG-18	1800x1400 mm
SR-ZHG-20	2000x1400 mm

Workbench height

- Horizontal position of the worktop — 800 mm
- In vertical position of the worktop — 1760 mm
- Available only in technical version. Supplied in a set with casters.
