### Punch & Anvil Set 10mm Stud

Press Stud Tool – Punch & Anvil is used to quickly and easily fix studs to ESD matting for grounding benches and floor mats. Once fitted, the press studs create earth grounding points on the mat for ease of connection to ground cord.

#### FEATURES & BENEFITS

- Easy to use
- High quality material
- Kit contains punch and anvil
- Additional studs available to purchase

#### INSTRUCTION

1. Punch a 5 mm diameter hole in the mat in the desired location.
2. Insert post from underneath, apply stud over the protruding post on upper side.
3. Fit anvil under the post.
4. Place punch inside stud and hammer post until it rolls and a tight assembly is achieved.
5. Alternately, the punch may also be fitted in a hand-operated arbor press for installation.
6. Check that the stud holds firmly and makes good electrical contact with the mat.
