

DATASHEET

 <p>ESD Safety</p>	
<p>HOT TWEEZERS WIRE STRIPPERS</p> <p>SKU: M-20 & 7B</p>	

PRODUCT INFORMATION

HOTWEEZERS® come in Electrostatic Discharge (ESD) and use either the M-20 (ESD) power supplies, featuring an on/off switch, "HI" and "LO" settings, a variable temperature control, and a unique holder for the hand unit. Placing a hand unit in the holder activates a switch that sets the temperature control to a low power idle mode. When the stripper is removed from the holder, the control is switched back to the original setting.

The supply provides an isolated, low-voltage output for operator safety and the power cord comes with a 3-prong plug to satisfy OSHA requirements.

Power supply units come 220v version.

Wire gauge for 7B hand units are AWGs 28, 26, 24, 22, 20 & 18.

FEATURES

<p> Ergonomically Designed</p> <p><i>HOTWEEZERS®</i> fit comfortably in the hand, making the stripping operation smooth and natural, increasing output and reducing fatigue</p>	<p> Lightweight for Heavy Output</p> <p>Small and lightweight! The hand unit weighs less than 2 ounces (57g) including cable and connector</p>
<p> Maintenance Free</p> <p>Hermetic sealing of the heating element in a high-temp alloy means NO oxidation, misalignment, or inefficient use of generated heat</p>	<p> Precise and Efficient Stripping</p> <p>Our unique tip design is more resistant to cool-down, and can be precisely controlled for Tefzel®, Teflon®, and silicone rubber without charring</p>
