Thermal Tweezers

SKU: M10, M20

Meisei Power Supplies (ESD & Technical)

The most unique features of anti-static hot tweezers wire stripper is that the heater filaments are completely sealed in stripping head. The head is fabricated from high-strength and high-temperature alloy with very good oxidation and wear properties. Hermetic sealing for the filaments in a high-temperature allot offers several advantages.

Meisei's Hot tweezers are currently used in a variety of industries including aerospace, medical, electronics, and maritime. Hot tweezers represents the state of the art in the design and construction of thermal wire strippers.
