

DATASHEET

MINI PROBE SET WITH 2 TEST LEAD

SKU: EP0204004

PRODUCT INFORMATION

Mini sample set for surface resistance measurement on small packaging, e.g. SMD blister belts, conveyor belts, deep-drawing trays, etc.) according to IEC 61340-4-10. The measuring head can be replaced. Due to the even pressure by spring-loaded electrode pins, this mini sample set is ideal for measuring cavities. The scope of delivery includes a two-point electrode (model 844), a conductive case and a calibration certificate.

- Ideal for measuring cavities
- Even pressure due to spring-loaded electrode pins
- Conductive contact rubber
- Interchangeable measuring head

Scope of delivery:

- Two-point electrode model 844
- conductive case
- Calibration certificate

Technical specifications:

- Diameter: 22 mm
- Overall length: 220 mm
- Electrode gap: 6.4 mm
- Connection: 4 mm banana plug
