

CompaCLEAN

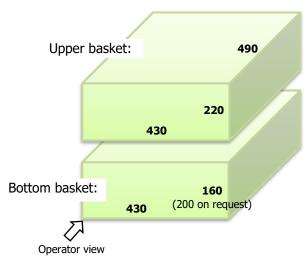

HIGH PRESSURE SPRAY-IN-AIR CLEANING SYSTEM

Standard inner basket space (other on request). With bottom basket only:

Standard inner basket space (other on request). Bottom basket, upper basket and centric nozzle system:

Technical data

- Standard usable space for cleaned material (WxLxH) 480 x 500 x 500 mm (with bottom basket only)
- Standard usable space for cleaned material (WxLxH) 480 x 500 x 160 mm (200 mm on request) and 480 x 500 x 220 mm (with upper basket and centric nozzle system)
- Particular position and space depends on given clamping
- Specific requirements to be consulted with manufacturers' representatives
- Customization available upon request

Machine types

CompaCLEAN II	Wash (Heat to 60 °C) + Tap Water Rinse + Dry
CompaCLEAN III	Wash (Heat to 60 °C) + 1 st Rinse (Tap water or DI water) + 2 nd Rinse (DI water) + Dry

Process data

(Use, capacity and consumption of machine)

Typical consumption of cleaning agent w/o load (per one cycle)	0.15 liter	
PCB defluxing and Misprints – max usable area at the disposal	2.55 m ²	
Standard max. components height from front side + rear side	40 mm (other on req.)	
Max load in 3U-160 eurocards (100x160mm) per one cycle	140 pcs	
PCBA + Misprints 3U–160 eurocards (100x160mm) typical total cycle time	60-80 min	
PCBA + Misprints 3U–160 eurocards (100x160mm) typical quantity per hour	Up to 140 pcs	
PCBA + Misprints typical consumption / cycle (depends on PCB shape and pollution)	0.3–0.4 liter	
Solder pallets – available space (necessary to specify clamping)	480 x 500 x 500 mm	
Solder pallets typical quantity per hour	4–6 pcs	
Typical total cycle time for solder pallets	45–60 min	

Typical consumption and typical time are based on values from the field, however cannot be guaranteed because of other factor influence.

Technical parameters

Machine dimension (WxLxH)	1 060 × 1 680 × 2 220 mm		
Weight (without liquid)	440-485 kg		
Machine noisiness	La <70 dB		
Power supply voltage	3x 400 V / 230 V, 50 Hz; 3x 208 V / 120 V, 60 Hz		
Power input	13.2–18 kW		

Adjustable parameters

All the parameters are adjusted by means of the LCD touch screen.

Washing time (all types)	0–99 min.
Washing medium temperature (optional)	Up to 60 °C
Rinsing time (all types)	0–99 min.
Rinsing temperature (optional)	Up to 40 °C
Conductivity (II, IIR, IIR+,III)	0–999 μS/cm
Drying time (all types)	0–99 min.
Drying temperature (all types)	Up to 110 °C
Number of program registers (settings)	99

Note: All the adjusted parameters are not changed when the power supply is switched on or off.

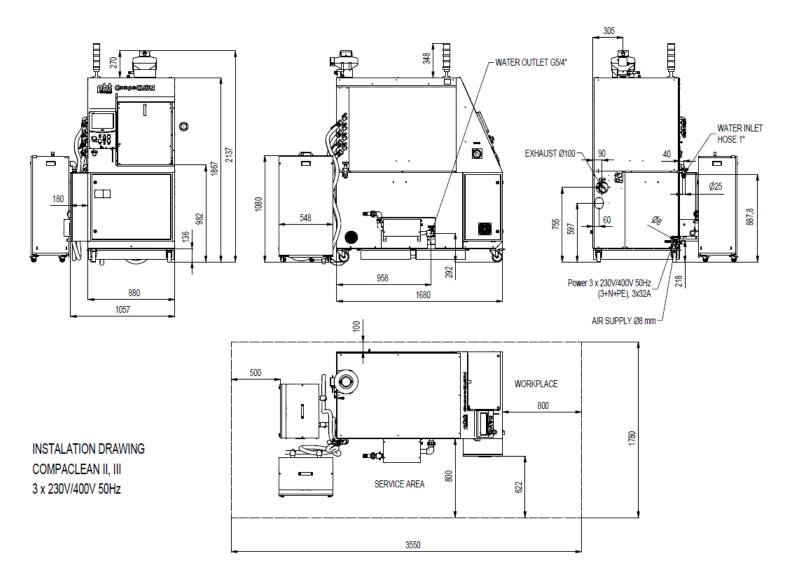

Technological parameters

Standard – S	Not possible – N	п	ш	
Power input (according to configuration)			13.2–18	kVA
Washing – pressure on the nozzles max/min (sprayed from all 69 nozzles)		2,3/1,7	2,3/1,7	bar
Washing – max. flow (sprayed from all 69 nozzles)			140	l/min
Washing – pressure on the nozzles max/min (sprayed from 33 upper nozzles)			3,6/3,1	bar
Washing – max. flow (sprayed from 33 upper nozzles)			85	l/min
Rinsing w/o chemical filters – pressure on the nozzles max/min (sprayed from all 69 nozzles)			0,6/0,1	bar
Rinsing w/o chemical filters – max. flow (sprayed from all 69 nozzles)			70	I/min
Rinsing w/o chemical filters – pressure on the nozzles max/min (sprayed from 33 upper nozzles)		1,7/1,2	1,7/1,2	bar
Rinsing w/o chemical filters – max. fl	ow (sprayed from 33 upper nozzles)	58	58	I/min
Rinsing with chemical filters – pressuall 69 nozzles)	re on the nozzles max/min (sprayed from		0,3/0	bar
Rinsing with chemical filters – max. flow (sprayed from all 69 nozzles)			50	I/min
Rinsing with chemical filters – pressure on the nozzles max/min (sprayed from 33 upper nozzles)			1,3/0,8	bar
Rinsing with chemical filters – max. flow (sprayed from 33 upper nozzles)			50	I/min
Washing tank volume max/min		71/35	71/35	/
Rinsing tank volume max/min		60/35	35/18	/

Note: Approximate values of pressure and flow are stated. The real values can be a bit different depending on the tolerances of used components. These differences have no effect on cleaning

Dimensions

Required service and maintenance area

From the front side of the machine minimally 0,8 m – Area for machine operation and accessing area into the

switchboard (in accordance with directive IEC 60364-1:2005)

From the left side min. 0,8 m – area for machine service and maintenance

From the right side min. 0,1 m

The machine rear part min. 0.2 m – exhaust system connection (machine w/o external filtration)

The machine rear part min. 0.5 m (machine with external filtration – filtration carts)

Ceiling height minimal 2.3 m
