Integrity cut resistant palm coated gloves

602-0110

Gloves made with Dyneema® feature polyurethane coated palms. They offer unparalleled cut protection, especially considering how highly dexterous and flexible they are. Dyneema® is one of the strongest fibres in the world, 15 times stronger than steel on an equal-weight basis, and twice as strong as Kevlar. Gloves made from Dyneema® have a characteristic slipperiness to them, which aids cut resistance. The 13-gauge, lint-free, continuous filament also gives a non-linting glove that maintains great dexterity, making them ideal for working with everything from circuit boards to food.

APPLICATIONS

- Sharp Steel
