

Technical Data Sheet

CRAMOLIN® VASELINE Art. No. 114

Product description

VASELINE consists of high-purity white Vaseline, which is very easy to apply in the present spray form. It is absolutely free of acids and gives a good corrosion protection. Moreover, it has excellent lubricating properties of universal use. VASELINE is chemically neutral, does not attack any material, and is non-toxic.

Application

VASELINE can be used as a lubricant in aerial erection work, telecommunication and in the manufacture of sideways. It provides a good corrosion protection on cable terminals, terminal screw connections, etc.

Please note

Shake can well before use. Spray thoroughly on parts to be treated. For accurate work use the attached extension tube. Spray from a distance of approximately 30 cm on parts to be treated. Surfaces should be dry and free of grease and dust. Further information concerning VASELINE to be found in recent MSDS.

Technical Data

Color:	white
Odor:	that of solvents
Density aerosol at 25° C:	0,73 [g/cm ³]
Setting point:	approx. 53[° C] (DIN 51556)
Compatibility with materials:	excellent
Skin tolerability:	excellent
	Meets Germ. Fed. Dispense. 10

Storage / Shelf Life

Shelf life is 2 years if stored correctly.
Package after emptying to be disposed via metal scrap.
