

TECHNICAL DATASHEET

ESD Protection Solutions

SKU: EDP04003001

STAINLESS STEEL STATIC DISCHARGER 400X300X1MM, WIRE SIZE 6MM

Material: High-quality stainless steel for durability and corrosion resistance

Dimensions: 400x300x1mm for precise static electricity dissipation

Wire Size: 6mm, ensuring optimal conductivity

Efficiency: Enhances static charge handling for reliable performance

Applications: Essential for industries where static discharge is critical

Versatility: Suitable for various technical and industrial environments

Reliability: Precision-crafted for safety and operational consistency

FEATURES & BENEFITS:

- Ensures workplace safety by mitigating static electricity risks.
- Provides consistent, reliable performance for industrial operations.
- Offers versatility, making it adaptable to various applications.
- Reduces long-term maintenance costs with its durable design.
- Durable stainless steel construction
- Precise dimensions (400x300x1mm)
- 6mm wire size for effective conductivity.
- Ensures safety, delivers reliable performance
- Offers versatility for various applications, and reduces maintenance costs over time.
